

Future Medics Club

**Bring a Medical Themed
After-School Club to Your School!**

From the desk of

Tom Warrender

Head Honcho of Inspiration

Medical Mavericks

Hello fantastic teacher!

If you run after-school clubs at your school, this could be very exciting for you and your pupils!

You see, we've launched the UK's very first **medical themed after-school club** for primary schools. It's hands-on, practical, packed with REAL medical kit... and completely unlike anything else in the country... or the world!

What's even better... this is your opportunity to bring it to your school in 25/26 and beyond!

Here's some of the most popular activities your pupils can experience by attending club:

- * Use an ultrasound to see their own bones, muscles & organs!
- * Record and print their own ECG from their heart
- * Try their hand at keyhole surgery
- * Take a photo of the inside of the eye
- * Take blood from a fake arm!

*Turn over to
find out more...*

What you need to know about the Future Medics Club:

- * Club runs for 5 weeks (1 session / week after-school)
- * Up to 22 pupils per club - from years 4, 5 & 6
- * Fully trained staff with enhanced DBS
- * We handle all the admin, bookings & signing in/out
- * Parents sign up directly through our secure website
- * Just £54 per pupil (instalment option available / ask us about PP!)

We'll **kick things off with a whole school assembly** to inspire EVERY pupil and help you tick off some Gatsby / Careers benchmarks too! We usually run this assembly in the half term before the one the club will run in.

All you need to do is hand out the flyers to years 4, 5 & 6 and send a promo email / text to parents - we can provide the copy for these too!

All pretty straight forward, right? Now imagine your pupils going home and telling their parents:

"Mum! Dad! I did surgery and scanned my own retina today!"

(Not the usual "yeah, it was alright" we both know too well!)

Their parents will be wondering what on earth have they been doing, but also **happy that their child has returned enthusiastic and excited about your school**, and the opportunities you can offer them.

To book your Future Medics Club & your FREE assembly just head to the website, scan the QR code, give us a call or send us an email!

Future Medics After School Club

Play with REAL MEDICAL KIT!

The UK's
only Medical
Themed After
School Club
Coming to your child's school!

SEE WHAT ALL THE
EXCITEMENT IS ABOUT!

I think this club was the most enjoyable club I've been to. I would highly recommend this club for all the other schools in the UK and I would love to do this all over again. Thank you for this amazing experience.

Fanni, aged 11,
Primary School in Dudley

The Future Medics After School Club is a perfect way to inspire your child with the amazing world of science, medicine and how the body works!

Over 5 weeks they will be able to try out & experience using real medical kit from our mobile hospital that we set up in the classroom. They will be able to see how their body works as well as discover all about the different jobs & careers there are in a hospital.... Because it's not all about doctors & nurses – there are over 300 amazing jobs in the NHS!

You may be thinking it is far too early to start promoting careers to my child, but...

...that's not what we are really trying to do!

The club is there to help support you and the school in raising your child's aspirations & give them experiences and memories that they will look back on for years to come. As well as showing them how totally awesome science & medicine is!

We call it:

**'putting the inspiration in...
...to get the aspirations out!'**

How do we do this? Well, your child will be able to complete some seriously cool tasks, including:

- Use an ultrasound to see inside their own body!
- Take blood from a fake arm!!!
- Record an ECG from their heart
- Take a photo of the inside of their eye ball!
- and much more....

The sessions are delivered by our amazing team of fab science and ...

... medical presenters who are fully trained and experienced inspiration makers & science superstars

All of the kit is totally safe for your child to use with our team. We have been delivering sessions in schools since 2009 with 1,000s of schools & tens of thousands of children being inspired since we started.

To see your school's club dates & to book your child onto the Future Medics Club at their school, visit www.medicalmavericks.co.uk/afterschoolclub

Everything you need to know about the Future Medics After School Club

Who is it for and how many can take part?

Years 4, 5 & 6 can take part, but it is limited to only 22 places per club, so be quick if you want your child to attend!

How many sessions are there and how long are they?

5 x sessions after school for around 50min.

How much is it to attend the club?

It is £54 per pupil for the 5 sessions. You can book & pay online using the link or QR code above or on the back page. A two part instalment option is available

Do you offer parents a guarantee?

Yes, if your child didn't enjoy the first session, you can get a full refund!

Dawn showing her friends how to take blood from Andy the injection arm.

A picture of the retina and Mo experiencing the pathology goggles

Tom showing Amy her heart on the ultrasound machine

Harry trying complete the key hole surgery challenge with Jaz and Nick helping out.

Parent & Pupil Testimonials!

I liked the sports its amazing
 you should try it out its epic
 every thing is cool I liked
 doing the medical stuff.
 Thank you Tom it was
 epic!

John, aged 9,
 Primary School in Dudley

Awsome. It was the best
 club I've ever done.
 Please do it next year.
 Thankyou.

Tim, aged 10,
 Primary School in Dudley

Tom

MY DAUGHTER EMILY ENJOYED
 EVERY MINUTE OF THIS WORKSHOP. I LOVED
 HER TELLING ME ALL ABOUT WHAT SHE
 HAD DONE WHEN I PICKED HER UP
 I HOPE YOU RETURN TO HER SCHOOL
 AGAIN IN THE NEAR FUTURE.

MANY THANKS.

Parent, Wolverhampton
 Primary School

Anne taking blood from Andy the Injection Arm

My daughter really enjoyed
 these lessons her favourite one
 was taken the blood from the
 plastic arm, and the heart
 beat, she would have
 liked more lessons, would
 do it again.

L. Subhik

Parent, Dudley
 Primary School

I really enjoyed the fake arm and
 Batak wall. Tom was very friendly
 and I wish it didn't have to end!!
 I would recommend it to
 everyone at school!!!

Lauren, aged 11,
 Wolverhampton Primary School

Rajni getting ready to have a picture of her retina taken!

my son, Jamie Kemp, really enjoyed the
 club. He came home every week telling
 us all about what he had done
 and then researched it on the internet.
 Definitely worthwhile.

Parent, Dudley
 Primary School

Here's some of the most popular **O.M.G, Jaw Dropping** activities your child can take part in at the **Future Medics Club!**

Each week your child will be able to complete an awesome workbook so you can see what they have learnt and find out what really got them buzzing.

Basic Medical Obs

We'll record everything from blood pressure, to oxygen sats to temperature and even record and print their own ECG! (that's the wavy line you see on Holby!)

Ultrasound Scans

Using our very special ultrasound, we'll be looking for growth plate in their wrist and muscles in the forearm. They'll also be an opportunity to see their own heart if they want to!

Respiratory & Lungs

Most children have seen or used a peak flow, but we take it a step further measuring their lung volume with a spirometer! We even record their respiration rate & depth (that's how fast and deep they breath!)

Keyhole Surgery

Don't panic! They don't try this on each other! Instead they practice on a special training box that surgeons use to hone their surgical skills!

Strength & Reactions

To be a medic, you have to be fit! So we also have a series of strength tests, including hand grip, pull strength and reactions tests on the Blaze Pods!

Senses

With a series of weird experiments that explore their senses, this one is guaranteed to make them OMG & LOL! From floating arms, to optical illusions, to discovering if you are super taster... Be prepared to try these at home after the club!

Blood & Germs

All performed under strict supervision, they can take blood from our training arm, using a real needle. This is the highlight of the club for many pupils!
